PROFESSIONAL SUMMARY

MCA graduate with backend development experience in FastAPI, shipping features that serve 1M+ students on a medical education platform. Solo restored a broken full stack application to a fully functional state in one month, fixing 15+ critical bugs across frontend and backend. Comfortable writing code from scratch and building AI augmented development workflows to accelerate delivery.

EXPERIENCE

Software Developer Intern — [KodeAstra](#) May 2026 – Present

- Built an end to end AI driven development pipeline covering branch creation, planning, code review, testing, and CI/CD deployment using subagents, hooks, and skills to reduce manual overhead.
- Built and shipped 2 backend features using FastAPI for Archer Review, a medical education platform serving 1M+ students, developing 10 API routes that power exam scheduling and grading workflows.
- Independently restored a broken full stack application (Planibble) to a fully functional state within one month, fixing 15+ critical bugs across frontend and backend with guidance from senior engineers.

Software Developer Intern — [Ash7Hub](#) Dec 2025 – Mar 2026

- Solely designed and built the backend for FlowCRM, a manufacturing ERP platform, architecting 131 REST API endpoints across 14 modules using FastAPI, covering the complete order lifecycle from enquiry to invoicing.
- Implemented complex workflow logic including multi level quality inspection sign offs and Razorpay payment reconciliation, validated through 549 automated backend tests.

PROJECTS

Archer Review — Medical Education Platform | [KodeAstra](#) · FastAPI

A medical education platform ranked among Deloitte's Technology Fast 500 and Inc 5000, serving 1M+ students.

- Built the Study Calendar feature enabling 1M+ students to generate personalized 1 to 6 month exam prep schedules, splitting video content across available daily study hours while accounting for holidays and rest days, and designing the schema.
- Built the Educator Grading feature allowing educators to define custom grade boundaries (e.g., 80% as an A under one grading scheme, 90% under another), ensuring accurate reflection across student test statistics without disrupting existing grade calculations.

Planibble — Cloud Fitness Platform | [KodeAstra](#) · React JS · Flutter · Node.js · PostgreSQL

- Took ownership of a broken full stack fitness application where core functionality, workout plan creation, was completely non functional, leaving the client unable to use the app at all.
- Independently diagnosed and fixed 15+ critical bugs across frontend and backend, including a broken API call preventing profile saves, a missing trigger blocking workout creation, and completed workouts failing to log in history.
- Used Claude Code to accelerate codebase comprehension and debugging, directing it to trace root causes and validate fixes, restoring the app to a fully functional state within one month, now under review with the team and client for next steps.

FlowCRM — Manufacturing ERP Platform | [Ash7Hub](#) · FastAPI · PostgreSQL · Razorpay · Brevo

- Architected a 14 module manufacturing ERP covering enquiry, quotation, purchase order, production, inspection, and invoicing as the sole backend developer, building 131 REST API endpoints validated by 549 automated tests.
- Designed a nested state machine for the Job Card and quality sign off chain, enforcing ISO 9001 traceability through an auditable rework history, multi level conditional validation, and explicit transition rules blocking illegal status jumps.
- Built the Final Inspection module to auto reconcile document completeness across four upstream modules, and integrated Razorpay Payment Links with HMAC verified, idempotent webhook processing across 8 payment modes, secured via a shared encryption service.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, SQL
Frameworks:	FastAPI, Spring Boot, React JS
Databases:	PostgreSQL, MySQL, Redis
Tools:	Docker, Git, GitHub, Postman, VS Code, IntelliJ IDEA, Cursor AI, Claude Code
AI & Automation:	Claude Code, MCP, Agent Skills, Sub-Agents, LangChain, LangGraph, RAG, Langflow, Pydantic AI, Prompt Engineering

CERTIFICATIONS

Anthropic (11):	Claude Code in Action · Introduction to MCP · MCP Advanced Topics · Introduction to Agent Skills · Introduction to Subagents · AI Fluency: Framework & Foundations · AI Capabilities and Limitations · Claude Platform 101 · Claude Code 101 · Claude 101 · Introduction to Claude Cowork
Coursera:	IBM Full Stack JavaScript Developer · Object-Oriented Programming in Java · Spring Framework for Java Development
SkillRack:	SQL Basics

EDUCATION

Master of Computer Applications (MCA)	77.4%
KGISL Institute of Information Management, Coimbatore	Aug 2024 – Apr 2026
B.Sc. Computer Science	82.8%
Sri Ramakrishna College of Arts and Science, Coimbatore	Aug 2021 – May 2024
