PROFESSIONAL SUMMARY

MCA graduate with hands on backend experience in FastAPI, including building core modules for a manufacturing ERP and shipping features on a medical education platform used by over 1 million students. Also restored a broken full stack application to working order in one month, fixing bugs across the frontend and backend with guidance from senior engineers. Comfortable using AI tools like Claude Code to move faster without cutting corners.

EXPERIENCE

SOFTWARE DEVELOPER INTERN | KodeAstra | May 2026 – Present

- Designed and built an AI driven dev pipeline on GitHub Actions, architecting Claude Code sub agents including a Requirement Compliance agent that checks generated code against its own generated docs. Wired in GitHub and Playwright MCP integrations and debugged pipeline failures with AI assistance, covering everything from requirement docs to automated PR review and merge, with mobile approval gating on risky steps. Presented to leadership as a proposal for team wide adoption.

Archer Review, Medical Education Platform | FastAPI

- Built the Study Calendar feature, used by over 1 million students to generate personalized 1 to 6 month exam prep schedules. Designed the schema and wrote the logic to split video content across each student's daily study hours, accounting for holidays and rest days.
- Built the Educator Grading feature, letting educators set custom grade boundaries (for example, 80% as an A under one scheme, 90% under another) that reflect correctly in student statistics without disrupting other grading schemes.
- Wrote 10 API routes across both features, shipped to a platform ranked among Deloitte's Technology Fast 500 and Inc 5000.

Planibble, Cloud Fitness Platform | React JS, Flutter, Node.js, PostgreSQL

- Took over a broken fitness app the client couldn't use. Profile updates weren't saving because the submit button wasn't wired to the API call, workout generation was failing from bad data being passed to the API, and completed workouts weren't showing up in history. Fixed all three, plus other issues, using Claude Code to speed up tracing root causes across the codebase, and got the app fully functional again within a month.

SOFTWARE DEVELOPER INTERN | Ash7Hub | Dec 2025 – Mar 2026

FlowCRM, Manufacturing ERP Platform | FastAPI, PostgreSQL, Razorpay, Brevo

- Owned the customer flow modules (enquiry, quotation, invoicing) and project setup and automation on a 14 module ERP built with one other developer, using AI assisted development to build and test the REST API.
- Built the Final Inspection module to auto reconcile document completeness across four upstream modules.
- Integrated Razorpay Payment Links with HMAC verified webhook processing across 8 payment modes, validated through an automated test suite.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

AI & Automation: Claude Code, MCP, Agent Skills, Sub Agents, LangChain, LangGraph, RAG, Langflow, Pydantic AI, Prompt Engineering

Frameworks: FastAPI, Spring Boot, React JS

Databases: PostgreSQL, MySQL, Redis

Tools: Docker, Git, GitHub, Postman, VS Code, IntelliJ IDEA, Cursor AI

CERTIFICATIONS

Anthropic: 11 course learning path including Claude Code in Action, Introduction to MCP, MCP Advanced Topics, and Introduction to Subagents

Other: IBM Full Stack JavaScript Developer (Coursera), Spring Framework for Java Development (Coursera)

EDUCATION

Master of Computer Applications (MCA), 77.4%

KGISL Institute of Information Management, Coimbatore | Aug 2024 – Apr 2026

B.Sc. Computer Science, 82.8%

Sri Ramakrishna College of Arts and Science, Coimbatore | Aug 2021 – May 2024
